1

What are fabrics made up of ?

- Coir Yarn Wool Bolls

2

Which of the following animals gives us wool?

- Sheep Angora rabbit Yak All the above

3

Which of the following is a natural fibre?

- Polyester Cotton Nylon Satin

4

Silk and wool are _____ fibres.

- Natural Artificial Semi natural Chemical

5

Silk fibre is drawn from the cocoon of a:

- Butterfly Bag worm Silkworm Honey bee

6

Natural fibres are obtained from petroleum.

- True False

7

Polyester and nylon are _____ fibres.

- Synthetic Natural Semi-natural None of the above

8

Which of the following is a synthetic fibre?

- Silk Acrylic Wool Jute

9

Both cotton and nylon are natural fibres.

- True False

10

Fruits of a cotton plant are called:

- Cotton fibre Cotton bolls Cotton seeds Cotton fruits

11

Cotton from cotton bolls is usually picked by using _____

- A needle Hands Legs Sticks

12

If a piece of fabric burns, giving the smell of burning paper and leaves behind a small amount of ash; it is most likely made up of :

- Cotton Jute Silk Wool

13

A fabric burns, giving the smell of burning hair and slowly forms grey sticky beads. This fabric is made up of:

- Cotton Silk Polyester Jute

14

Cotton is obtained from :

- Its stem Its roots Its seeds Its leaves

15

Separating cotton fibres from its seeds is known as:

- Spinning Shearing Ginning Knotting

16

Jute fibres are obtained from the:

- Leaves of a jute plant Roots of a jute plant Stem of a jute plant
 Fruit covering of a jute plant

17

In which season is a jute plant cultivated?

- Winter season Summer season Rainy season Autumn season

18

Jute is the outer covering of a coconut.

- True False

19

The fibre which is obtained from the outer covering of a coconut is:

- Flax Hemp Coir Jute

20

Which of the following can we not make using coir?

- Foot mats Carpets Saree Ropes

21

Which of the following is a fibre obtained from plants?

- Wool Coir Silk Polyester

22

How are silk worms reared?

- On the leaves of a mulberry plant On the leaves of a banyan plant
 On the leaves of a betel plant On the leaves of a cotton plant

23

The process of making yarn from fibres is called :

- Spinning Shearing Ginning Knitting

24

Which of these states does not grow jute?

- West Bengal Bihar Kashmir Assam

25

The jute plant is harvested at the _____ stage.

- Sapling Flowering Matured Germinating

26

Which of these Indian states grows cotton?

- Bihar Maharashtra Uttar pradesh Goa

27

The process of arranging two sets of yarns together, to make a fabric is called:

- Spinning Combing Knitting Weaving

28

Which of the following devices is used for spinning?

- Pins Needles Charkha Iron rods

29

Weaving of fabric is done on _____

- Looms Needles Charkha Plain ground

30

The technique in which a single yarn is used to make a piece of fabric is called :

- Shearing Knitting Combing Stitching

31

Which of these is an example of a clothing made up of knitted fabrics?

- Shirt Trousers Socks Handkerchief

32

Which of these items cannot be made using jute?

- Sarees Bottles Bags Ropes

33

Which of these plants render natural fibres?

- Cotton plant Wheat plant Bajra plant Neem plant

34

Charkha was associated with which one of the following noted personalities?

- Meera Bai Mahatma Gandhi Dr.Rajendra Prasad Jawaharlal Nehru

35

A material which is available in the form of thin and continuous strands, is called:

- Fabric Fibre Cotton Plastic

36

Which of the following is a man made fibre?

- Wool Polyester Silk Jute

37

Which of the following is a plant fibre?

- Wool Silk Flax Polyester

38

The best soil to grow cotton is red soil.

- True False

39

Which of the following statements describes 'shearing' perfectly?

- The process of rearing animals
- The process of making wollen fabric from fibre
- The process of removing hair from the body of sheep
- The process of twisting of jute fabric

40

Pashmina wool is obtained from:

- Camel
- Sheep
- Goat
- Rabbit

41

Which of these fibres is non-biodegradable?

- Cotton
- Jute
- Wool
- Nylon

42

Which of these fibres is obtained from a flax plant?

- Cotton
- Linen
- Jute
- Nylon

43

Which of the following materials was not used in ancient times by humans, to cover their bodies?

- Animal skins
- Big leaves of trees
- Furs
- Clothes

44

The life cycle of a silk moth is in the order of:

- Eggs, pupa, larva, adult moth
- Eggs, larva, pupa, adult moth
- Eggs, larva, adult moth, pupa
- Pupa, eggs, larva, adult moth

45

The fleece of sheep is procured during the cold weather.

- True
- False

46

Gunny bags are made up of _____ fibres

- Jute Synthetic Cotton Silk

47

Which country is the largest producer of jute products in the world ?

- Japan Brazil Bangladesh Pakistan

48

Which of the following is not made up of wood?

- Chair Cot Table Mattress

49

Synthetic fibres are made up of:

- Plastic Wood Petroleum Rubber

50

Summer wear is generally made up of:

- Cotton Wool Nylon Jute

51

Which of the following is not made up of coconut fibres?

- Rope Foot mat Carpet Saree

52

The fibres synthesized by human beings are called natural fibres.

- True False

53

Winter wear is made up of:

- Silk Nylon Wool Cotton

54

We wear woolen clothes in winter, as wool is:

- A bad conductor of heat Easily available in winter Soft and spongy
 Good conductor of heat

55

A long and continuous thread spun from a fibre is called a:

- Fleece Fabric Weft Yarn

56

Pressed cotton bundles are called a:

- Sponge Bale Pack None of the above

57

What is fleece?

- A bundle of jute fibres A bundle of cotton fibres The hair of sheep
 The skin of sheep

58

The industry related to fabric and clothing is called:

- Poultry industry Fabric industry Textile industry Agro industry

59

What types of clothes should be worn while working in the kitchen?

- Cotton clothes Jute clothes Nylon clothes Woolen clothes

60

Terylene is a popular form of:

- Polyester Rubber Jute Rayon

61

Which of the following statements is wrong?

- Polyester is a man made fibre Weaving of yarn makes a piece of fabric
 Silk fibre is obtained from the stem of the silk plant
 Cotton plants need a warm climate

62

The process of soaking a jute plant, to soften the stem material in order to extract the jute fibre is called:

- Softening Retting Drying Soaking

63

Find out the process regarding jute :

- Drenching Soaking Rotting Retting Retting

64

Which of the following is false, in case of artificial fibres?

- They are obtained from petroleum products
 They are more durable than natural fibres They do not absorb water
 Clothes made of artificial fibres are comfortable to wear, during both summer and winter

65

Cotton seed oil is used in the manufacture of:

- Canola oil Vanaspathi ghee Sunflower oil Corn oil

66

Warp is :

- A thread made by twisting fibres The yarn placed lengthwise in a loom
 A machine used for weaving cloth from yarn The process of twisting fibres

67

Which of the following materials has many folds and an uneven surface?

- Silk Rayon Wool Polyester
