**1**

Waste material that undergoes rotting is \_\_\_\_ in nature.

- Contaminated     Biodegradable     Non-biodegradable     Biodiversified

**2**

Waste material that cannot be broken down easily or takes very long time to rot is

- Biogenic     Biodegradable     Non-biodegradable     Non-abrasive

**3**

Municipal solid waste is often called:

- Sewage     Sludge     Garbage     Slurry

**4**

Which of the following is non-biodegradable?

- Domestic sewage     News papers     Vegetable matter     Aluminium cans

**5**

What is an area where garbage collected from a city or town is dumped called?

- Landscape     Landfill     Incinerated area     Landmark

**6**

Which colour dustbin do we generally use for collecting bio-degradable

waste?

- Blue  Green  Red  Yellow

**7**

Non-biodegradable waste, which does not decompose naturally is kept in a:

- Blue dustbin  Green dustbin  White dustbin  Maroon dustbin

**8**

Which of the following is not included in '3R' ?

- Reduce  Refer  Recycle  Reuse

**9**

The manure formed by kitchen wastes and garden wastes is called:

- Sewage  Compound  Compost  Non-biodegradable

**10**

The method of making compost from kitchen garbage using red worms is called:

- Hot composting  Vermi composting  Cold composting  Fertilisation

**11**

Which kind of garbage is not converted into compost by red worms?

- Orange peels  Plants parts  Egg shells  Aluminium foil

**12**

While making the compost, which of these materials will not stop the growth of red worms?

- Salt and oil  Meat  Fruit peels  Vinegar

**13**

Which of the following statements is incorrect with respect to the prevention of the dangerous effects of plastic?

- Carry jute or cloth bags for shopping
- Do not store food items in plastic bags
- We should burn plastic items after using them
- Reduce, reuse and recycle plastics

**14**

Which of the following is biodegradable?

- Plastic bottle
- Banana peels
- Tin cans
- Metal scraps

**15**

It is better to use compost instead of chemical fertilisers because:

- It is environment friendly and adds natural fertility to the soil
- It does not have adverse effect on nature and creates no pollution
- Soil will never lose its fertility if we use compost
- All the above

**16**

A non-biodegradable item can not be used to make a compost.

- True
- False

**17**

Which of the following is non-biodegradable?

- Cotton cloth
- Glass box
- Egg shells
- Card board

**18**

Which of the following is the best method of waste management?

- Burning of waste
- Spreading the waste
- Throwing waste in a drain
- Backyard composting

**19**

Which of the following cannot be used for composting?

- Left over food
- Rotten tomatoes
- Plastic bag
- Vegetable peels

**20**

We should burn garbage to keep the environment clean.

- True
- False

**21**

Which of the following statements is wrong?

- Waste management is necessary to protect the environment
- Biodegradable and non-biodegradable wastes should be separated
- Cooking oil and fats should be thrown in the drain
- Tea leaves and solid remains of the kitchen should be thrown into a compost pit

**22**

Biodegradable waste is decomposed in nature by microbes like bacteria and fungi.

- True
- False

**23**

The process of removing contaminants from wastewater:

- Filtering
- Sewage treatment
- Chlorination
- Waste management

**24**

Disinfection of water by the addition of small amounts of chlorine is called:

- Sieving
- Screening
- Chlorosis
- Chlorination

**25**

Which of the following is not a water-borne disease?

- Cholera
- Hepatitis A
- Cancer
- Typhoid

**26**

Which of the following is an environment friendly activity?

- Non-usage of plastic bags
- Using banana leaves instead of plastic plates
- Carrying a cotton bag while going to a vegetable market
- All the above

**27**

Which of the following is not a step towards reducing waste?

- Buy fewer things and use items for a longer time
